Re: Docket #07-16

Dear Secretary Dortch,

More and more Americans are working from home, as many as 45 million. For most, this requires a high level of connectivity, access to information, e-mail and on-line resources. Broadband internet makes all of that possible.

For many in this country, broadband internet service is unavailable or the cost is too high to make it a viable service for their home. If more businesses and homes had broadband internet, more Americans could enjoy the benefits of working from home. I support the proposal by M2Z Networks to provide fast, free, wireless broadband internet access to everyone. Making access to broadband widely available opens the door for many more Americans.

Great Inflates Party Rentals relies heavily on internet traffic and advertising. Americans today are turning to the internet first when they need to find a service. Having a website has helped my business generate more customers and I think all small businesses should be able to get connected and have their services shown online.

Please support this proposal and allow more broadband service to be available in this country. Having more homes and businesses with fast internet service connects the country and makes it more productive and competitive.

Sincerely,

Re: Docket #07-16

Dear Secretary Dortch,

In this country, over \$26 billion in retail sales are made over the Internet in just one quarter. That important economic impact could be improved if more people had access to broadband Internet access. With broadband, using the Internet and taking advantage of shopping sites is made easier. I urge you to provide more broadband access by supporting the M22 Networks plan to provide free, fast and family-friendly broadband to everyone.

If given the opportunity, this plan will provide access to millions who currently go without the option of receiving broadband. Those millions of people are likely to join the on-line purchasing community, adding billions more to the economy. As a whole, this country needs more people on-line, taking advantage of new purchasing opportunities. The boost would lead to improved sales and help small businesses across the country.

Greater access to broadband Internet will also help small businesses, like Valley Seamless Gutter, in another way. Valley Seamless Gutter is located in a rural area and broadband Internet access will allow such businesses to tap into a section of customers that is growing every day-the Internet customer. Giving more people access to the Internet allows consumers to not only become better consumers, but businesses to become better businesses.

Please work for this proposal's passing and work to help millions who would benefit from free, fast broadband access. I thank you for your time and considering this issue.

Sincerely,

Leonard "Bud" and Ruth McKinney

Re: Docket #07-16 to provide fast, free, family-friendly wireless broadband internet access

Dear Secretary Dortch,

99 percent of all business in the United States are small businesses. In today's economy, many of these small businesses benefit from online sales and internet marketing. Sadly, only 35 percent of small businesses have websites. If broadband internet was more widely available, or affordable, more businesses would be able to take advantage of the benefits of having their business online.

As a small businessman, I am in favor of the plan offered by M2Z Networks to provide fast, free, family-friendly wireless broadband internet access. With this fast, reliable and affordable broadband access, businesses will be able to better communicate and connect with the resources they need to run more efficiently. Also, with the optional services being offered, businesses can use the web for sales and marketing.

I urge you to approve the proposal by M2Z Networks and help provide small businesses with the opportunity to participate in the online market and to continue competing in the global economy.

Sincerely,

Douglas Stewart

RE: Docket No. 07-16

Dear Madam Secretary:

As a teacher, I believe no child should be left behind because existing broadband options are not affordable. Passage of Docket No. 07-16 would make broadband fast and free to the majority of Americans.

According to Pew Internet Report, at least 79 percent of college students rely on the Internet. At Apex Language Center, we teach English, Spanish, Polish, Hebrew, Russian, Italian, French and Latin. Our students rely on our website for the latest class offerings and registration.

If a student's only access to high speed Internet is at school, it will greatly limit their participation in on-line study groups, research and their ability to do homework.

Currently, the U.S. is ranked behind Estonia in terms of it's broadband penetration. That is not acceptable. The M2Z proposal would make the U.S. a leader in broadband penetration. Please support Docket No. 07-16.

Sincerely,

Kathy G. Gutierrez

Re: Docket Item #07-16

Dear Secretary Dortch:

With our nation is becoming increasingly dependent on reliable high quality broadband Internet service, it is important that we work to make sure that easy and affordable Internet access is available to all in our nation. This is especially important in the education of our children.

At present, the Department of Education indicates that only 59 percent of children now have access to the Internet. They also indicate that only 44 percent of Hispanic children, 47 percent of African American children and only 41 percent of children in households with incomes of less than \$20,000 use the Internet. This shows a growing divide in our country between those who can and those who cannot easily access the Internet.

As an association of teachers and school employees in Dallas, we support providing greater access to the Internet in the education of our children. We hope the FCC will continue to review and monitor ways to make the Internet more accessible to children and American families.

One proposal now before the FCC by M2Z Networks would establish a free nationwide Internet access capability. We hope the FCC will review this proposal, as well as others, that will improve the ability for children – as well as teachers – to access the Internet in an easy and affordable manner.

Providing equal education opportunities for our children is a priority for our Alliance. With the creation of a fast and affordable internet connection nationwide we can start the process of assuring that all children and families have equal access to the Internet and greater learning opportunities.

Thank you.

Sincerely,

Aimee Bolender

Re: Docket #07-16 to provide fast, free, family-friendly wireless broadband internet access

Dear Secretary Dortch,

Using the internet is a large part of the day for many Americans. Many rely on the internet for communication through email and some simply for play. But for small businesses, and those who work from home, the internet can be the main source of information, news or sales. When a small business is not connected to the Internet, the business is limited in its effectiveness and efficiency.

As a small business owner, I know that a fast and reliable internet connection allows me to be as efficient and as organized as possible, whether keeping track of client files and payment information, or receiving news and updates. I believe the proposal put forth by M2Z Networks to make wireless broadband internet available at no cost will help small businesses everywhere. By saving on the cost of broadband, or even receiving access for the first time, a small business can better use the tools of the internet such as marketing and online sales opportunities.

I know that saving on broadband access will increase the bottom line for small businesses. I urge you to taking advantage of the M2Z Networks proposal and continue supporting and building America's small businesses.

Sincerely,

David Henry

Dear Secretary Dortch,

I'm writing to you today to ask for your support of Docket #07-16, the M2Z Networks proposal to provide free, fast and family-friendly broadband internet to all Americans. I support their efforts to receive the necessary spectrum for this plan. Bringing high-speed internet services to more Americans will make our country more competitive as a whole.

While the U.S. now ranks 21st globally, more people will be able to use the internet with the help of M2Z Networks. As small business owner, I see the daily need for fast and reliable internet service. I also know the burden the high cost of internet places on small business owners.

I ask you to support the proposal to bring all Americans the opportunity to have fast, free, wireless broadband internet access. This will help our country catch up to other countries where it is already widely available and will help small businesses start-up and grow into successful businesses. Thank you for your time and consideration.
